Problem :

```
OSError: no library called "cairo" was found

no library called "libcairo-2" was found

cannot load library 'libcairo.so': error 0x7e

cannot load library 'libcairo.2.dylib': error 0x

cannot load library 'libcairo-2.dll': error 0x7e
```

How to Solve :

1 - Create project environment - " python -m venv env "

2 - activate environment - env/Scripts/activate

3 - visit - https://pypi.org/project/weasyprint/
    Install - "pip install weasyprint"

4 - Download and run the latest version of gtk3-runtime-3.24.31-2022-01-04-ts-win64.exe

    Visit and install-
"https://github.com/tschoonj/GTK-for-Windows-Runtime-Environment-Installer/releases"

5 - set up system environment variables path - eg : "C:\Program Files\GTK3-Runtime Win64\bin"

6 - Restart your Computer (Important step)

7 - Open Project and run - " python -m weasyprint http://weasyprint.org weasyprint.pdf "
comment

8 - run project - python manage.py runserver
